

CEON/CEES as a publisher: What we do for the Serbian journals

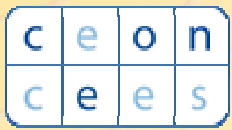

Pero Šipka
Centre for Evaluation in Education and Science,
Belgrade, Serbia

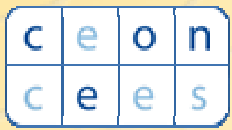

The main "products"

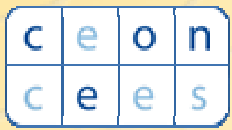

- SCIndeks: The national citation index
- Journal Bibliometric Report

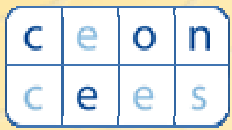

- to ensure visibility, for all active journals (N= 300)
- to ensure searchability of articles:
 - titles and abstracts
 - article references
 - article full text (if available)
- to ensure full text articles availability (from 130 journals)
- to be used as a tool for evaluation (authors and journals)

- allocating points: assigning journals into the one of so-called preliminary categories
- allocating money: making decisions about the amount of the support to the publishers
- allocating DOI/ Cross-Ref support

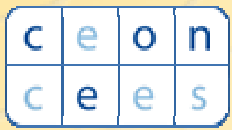

- providing journals with feedback for improving quality and impact
- providing journals with feedback for strategic positioning
- journals to get orientation about extent to which they meet international publishing standards
- to get orientation about chances to meet criteria for indexing in international databases (WoS, Scopus, Medline, etc.)
- providing Ministry of Science with data to be used in shaping national publishing policy

All in all, CEON/CEES Role

- assisting journals to make international career: for STM journals
- assisting journals in raising quality: SS&H
- assisting Ministry as a funding institution in shaping this process

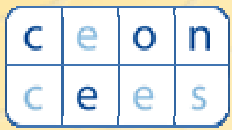

- working with journals directly: providing them with quality editing services
- on the way to work with journals from the region: Building a regional citation index (strengthened by additional services)
- ready to work with publishers of global citation indexes: WoS, Scopus

Our services may include:

- correcting data on local entites (authors names, affiliations, journal titles) in global evaluation tools (InCites, Research in View, SciVal)
- providing useful online information about journals local impact
- providing useful online information about journals quality

In return, we would find usefull:

- data on international performance of national authors
- data on international performance of national institutions
